

# RIVERODE ALLEYS

Utilizing 8 ft. or 10 ft. panels and horizontal slides, these are the most popular and economical alleys available. One can easily move or add to them if requirements change. Panels of different lengths can be used to make the alley turn. Standard widths are 27 in. and 30 in.

8 ft. scale platforms have horizontal slides on the ends and diamond plate steel floor. Channels are made to fit over electronic load bars.

V-alley sections are 10 in. narrower at the bottom than the top making it difficult for all sizes of cattle to turn around. Panels are 6 ft. tall with galvanized sheet steel covering the bottom 3 ft.

Bottoms can be raised to accommodate scales.

Custom curved alleys are available on request. Please call for more information.
