

# RIVERODE SALE FACILITIES

## SALE RINGS

These are the most widely used in the purebred industry today. Every ring is built to customer specifications with regard to dimensions, height, interior rise, entrance and exit, etc. Riverode Rings combine superior strength with quiet easy operation. The galvanized tubing keeps its attractiveness for years without maintenance. These are proven in sales of every breed under the most demanding environment with a cost that is surprisingly affordable.

## COMBINATION ALLEYS

An increasingly popular setup for cow-calf production sales, the combination side-by-side alley allows the calf to be next to the cow instead of in the same alley section with her. This results in a more relaxed attitude by both when they enter the ring.

## HERRINGBONE/ACCUMULATOR

This is the simplest and quickest way to organize cattle during the sale. Groups can be loaded into individual holding sections and released in specific sale order.

## HOLDING & DISPLAY PENS

Portable holding and display pens can be configured for any need whether new or existing. Let a Riverode representative design a system incorporating penning with movement into the sale alley.

## BLEACHERS

Available in 12 ft. and 16 ft. sections, bleachers have 6 rows of seats and a back on the top row. Lumber is not supplied.
